

Seminars in Biology

Autumn Semester 2021

PERO4 Auditorium 0.110

September 21
PROF. MATHIAS BELLER
From lipid storage to growth regulation

November 16
PROF. HANNA KOKKO
Good reasons to live shorter lives

October 5
PROF. CHRISTIAN PARISOD
Genomic drivers of plant diversity under environmental change

November 23
DR. PASCAL-ANTOINE CHRISTIN
Frequency and impacts of lateral gene transfers among grasses

October 19
DR. PIERRE-MARIE ALLARD
Computational Metabolomics and Open Science in (Natural Products) Research

November 30
PROF. FLORIAN STEINER
Epigenetic inheritance of centromere identity in *C. elegans*

October 26
DR. CHRISTIAN MÜNCH
Dynamic Cellular Responses to Stress and SARS-CoV-2 Infection

December 14
PROF. MARKUS KÜNZLER
How mushrooms defend themselves against predators and competitors

November 2
PROF. BENJAMIN TOWBIN
Individuality and robustness in organismal size control of *C. elegans*

December 21
PROF. BRIGITTE GALLIOT
Metabolic, cellular and developmental dimensions of regeneration in Hydra

November 9
PROF. SHAUL YALOVSKY
Diverse functions of ROP GTPase signaling in abiotic stress responses
