Conference

KROMATIX

Technology and sustainability -
the architecture of tomorrow

Founded in collaboration with the Swiss Federal Institute of Technology of Lausanne (EPFL), Kromatix is a young but dynamic company that developed a unique technology allowing solar panels to be integrated into building facades without losing any efficiency or conducting properties.

Diving into the fascinating world of Integrated Photovoltaics with Rafic Hanbali, the man behind the panels. During the conference, he will talk about the challenges of developing this one-of-a-kind technology and the key points that allowed him to launch Kromatix worldwide. From Lausanne to Dubai passing by Copenhagen or Singapore, Rafic Hanbali will reveal the secrets of Kromatix's success and give us an insight on his entrepreneurial philosophy.

If you are a young entrepreneur and would like to learn more about this success story, this conference is made for you !

COVID CERTIFICATE REQUIRED

Speaker:

Rafic Hanbali is the Managing Partner of Emirates Insolaire, a joint venture of Dubai Investments PJSC and InsOglass S.A. The Emirates Insolaire produces and distributes coloured solar glass and coloured PV modules using Kromatix™ technology, and provides complete solar

solutions for Building Integrated Photovoltaic (BIPV). A French national, Rafic is a physicist, a jet pilot and is trained in production, international trade, distribution, logistics, and air and sea transport.
