

The ABCCD team invites you to :

FACES, VOICES, SOCIAL EXPECTATIONS, AND FIRST IMPRESSIONS: INSIGHTS FROM AUTISM

Conference by **Ruth Grossman**

Assistant Professor - Head of the FACE lab,
Emerson College, Boston

Pavillon Vert
20 March 2023
17:30

During every face-to-face conversation, whether in person or on Zoom, we process a myriad of visual and auditory signals that lead us to form first impressions of our conversation partners within seconds. Research has shown that first impressions formed of autistic individuals tend to be less favorable than those formed of non-autistic individuals.

This presentation will explore some of these findings, as well as various factors that lead to these less favorable impressions, including facial and vocal expressions, as well as the social expectations of the conversation partners.

The talk will be followed by an aperitif. You can also **join us online**, please contact us for the meeting link.

Pavillon Vert
PER06 - Chemin du Musee, 6
1700 Fribourg (CH)

The participation is free,
but please register at
