

INVITATION

Conférence donnée dans le cadre de la procédure d'appel en
Chirurgie générale (succ. Prof. Bernhard Egger)

Prof. Dr. Martin HÜBNER

Department of Visceral Surgery, Lausanne University Hospital
CHUV, Lausanne, CH

Lundi, 3 avril 2023 à 08h30

Faculté des sciences et de médecine de l'Université de Fribourg

Auditoire 0.405, PER02 <https://www.unifr.ch/map/fr/plans/perolles.html>

New Treatments for Peritoneal Cancer

Recent advances have transformed Peritoneal surface malignancies (PSM) from a fatal diagnosis to a treatable and sometimes even curable condition with outcomes comparable to other metastatic sites. Heterogeneity of patients and rarity of the diseases are important challenges for clinical studies.

Plan of the presentation:

- The IDEAL framework for surgical innovation
- Pressurized IntraPeritoneal Aerosol Chemotherapy: a novel mode for PSM treatment
- Safe implementation and scientific evaluation of PIPAC
- Assessment of efficacy: easier said than done
- Is PIPAC IDEAL? Let's talk about the optimal treatment sequence

This lecture shall provide the non-expert professional with the tools for evaluation of surgical innovation through the concrete example of new ways to treat peritoneal surface malignancies.

Fribourg, le 14 mars 2023

Prof. Ulrich Ultes-Nitsche, Doyen et
Président de la Commission d'appel
