Infrastructures as Power in the Internet Governance Ecosystem

Opening lecture

Dr. Francesca Musiani

Associate Research Professor and Deputy Director,
Centre Internet et Société, CNRS, Paris

Internet governance is a normative « system of systems » in which legal instruments and parliamentary votes are combined with other instruments of power such as the market, community-based informal norms, and technical design choices. This talk will provide an introduction to this ecosystem, with a specific attention paid to infrastructures as instruments of governance.

The event is free and open to the public.

Tuesday 26.09.2023, 17:15-18:45

University of Fribourg, Blvd. de Pérolles 90 (room A230)

Followed by an apéro
