

INVITATION

Conférence donnée dans le cadre de la procédure de titularisation

PD Dr Marie-Noëlle Giraud
Département d'endocrinologie, métabolisme et
système cardiovasculaire (EMC)

Mercredi 22 janvier 2025, à 16h15

Auditoire 001 - PER 17
Chemin du Musée 8 - 1700 Fribourg
Faculté des sciences et de médecine de l'Université de Fribourg

Cell-Based Therapies for Myocardial Infarction

Myocardial infarction remains a leading cause of mortality and morbidity worldwide, with the limited regenerative capacity of the adult heart posing a significant challenge. Building on foundational concepts of cell fate, the role of the microenvironment, and cellular communication introduced during the teaching session, this presentation explores their relevance to cardiac tissue repair.

Specifically, it highlights the latest advancements in cell-based therapies, focusing on biomaterials, cellular secretomes, and the reparative role of macrophages. Preclinical findings from ongoing projects will be discussed, offering insights into the translational potential of macrophage polarization and its impact on myocardial regeneration.

Fribourg, le 7 janvier 2025

Prof. Ulrich Ultes-Nitsche, Doyen
Président de la Commission Titularisation
