This course highlights the main economics basis regarding anti-trust and competition policy. Its aim is to understand the mechanisms of market structure and firms behaviour facing competition constraints. On the other hand, the course focuses on the main drivers of competitiveness and how to strengthen the competitiveness of a company. The iimt courses Competition and Competitiveness provides you with all economic tools of competition policy and microeconomic drivers of competitiveness.

**Competition - 13th - 14th November 2018**
