

Seminars in Biology

Autumn Semester 2019

Tuesdays, 11.15 | Rue Albert-Gockel 3 | Auditorium 0.110 PER04

Sept 24

PROF. CHRISTOPH VORBUGER

Symbionts mediate host-parasitoid coevolution in insects

Oct 8

PROF. J-MARC GHIGO

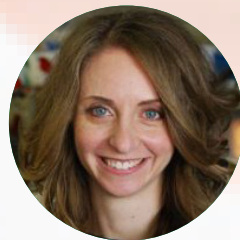

Causes and consequences of biofilm tolerance to antibiotics

Oct 22

PROF. YUKARI KUGA

High-resolution surface analysis and biological applications

Nov 5

DR VALENTINA CIANFANELLI

The multifaceted autophagy signalling in tumorigenesis: A mechanistic view

Nov 12

PROF. JAMES GRACE

Ecology: Reflections on the Great Productivity-Diversity Debate

Nov 19

PROF. KASPAR LOCHER

Bacteria & eukaryotes in the process of protein N-glycosylation

Dec 3

PROF. IVO WALLIMANN-HELMER

Environmental ethics in biology

Dec 10

PROF. SHAUL YALOVSKY

Function of ROP GTPases and their effectors as mediators of developmental and abiotic stress signaling

Dec 17

PROF. ENGLEBERT HOBMAYER

Dynamics in the interstitial stem cell system of Hydra
